Visiting scholars from overseas 1988–97

During the decade 1988–97 many scholars came from overseas to spend periods of sabbatical leave studying at the Institute. They included scholars from China, Denmark, Egypt, India, Israel, Japan, Mali, Nigeria and Portugal. Professor Keiji Imamura of Tokyo University, who spent the academic year 1993–94 at the Institute on a grant from the Japan Foundation, gave a series of seminars which he subsequently developed into the first book on Japanese prehistory to be published by a Japanese archaeologist in English: Prehistoric Japan: new perspectives on insular East Asia (London: UCL Press, 1996).

Most UK universities now regard fund raising as an integral part of their academic strategy. Major initiatives in research and training are increasingly funded by donations from charitable organizations, companies and individuals. In recent years the Institute has had two principal fundraising objectives: first, to create new laboratories and a secure artefact store in the basement, and secondly, to raise a substantial sum to support training in archaeological conservation. Both initiatives were successful, thanks first and foremost to substantial “core” grants from, respectively, the Wolfson Foundation and the Getty Grant Program of California. The former led to the opening, in 1991, of the Wolfson Archaeological Science Laboratories (see p. 5), and the latter to the doubling, by 1995, of the Getty Grant. The Institute is greatly indebted to all those who helped us achieve these two major objectives. The principal donors are acknowledged below, as is also a bequest in support of archaeometallurgical research.

The Wolfson Archaeological Science Laboratories
At the entrance to the Laboratories a brass plaque records the names of the principal donors, who contributed to a total that exceeded £400,000. The dedication reads as follows:

The Institute of Archaeology acknowledges the support of the following organizations and individuals whose generosity made possible the creation of these laboratories and storage facilities: the Wolfson Foundation, the Robert Kiln Charitable Trust, the Earl Fitzwilliam Charitable Trust, Margaret S. Drower, Eisai Europe, the Goldsmiths' Company, Harrison Ford, National Westminster Bank, Rosehaugh, Erasmus, Legal & General, anonymous donors, Friends and alumni of the Institute.

Tylecote archaeometallurgy bequest
The Institute gratefully acknowledges a bequest from the estate of the late Professor and Mrs Tylecote, which provides funds annually for postgraduate research in archaeometallurgy.

The Getty Grant Program
Thanks to the generosity of many individuals, charitable foundations and trusts, a sum of over £200,000 was raised. It has been invested and the income is now used to assist undergraduate and postgraduate students of archaeological conservation, who come from within the UK and from many other countries to study at the Institute (Fig. 1). Major donations were received from the following: the Acacia Trust, the Association for Cultural Exchange, the Charlotte Bonham-Carter Trust, the Ernest Cook Trust, the Earl Fitzwilliam Charitable Trust, Friends of UCL, Garfield Weston, the Nicholas P. Goulandris Foundation, J. Paul Getty, the A. G. Leventis Foundation, the Pilgrim Trust, the Seven Pillars of Wisdom Trust, and the Thriplow Trust.
